ON ROAD

SUPER TRACK

- » A decade plus worth of innovated refinements upon a proven design, is today's SuperTrack!
- » The CAS® SuperTrack was the first slinger truck to eliminate chain & sprocket on the placing conveyor, reducing owner down-time and maintenance costs.

FAT BOY

- » More capacity than ANY SLINGER TRUCK in the industry.
- » Lower center of gravity for a safer and smoother ride.
- » High Performance Hydraulics allows for superior operation.

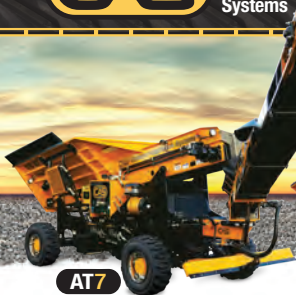

STEMMING

- » Safe, fast & the most accurate way to fill blast holes.
- » Proprietary technology allows for consistent and predetermined rates of material to be distributed down-hole.

OFF ROAD

AT7

- » **BEST SELLER!**
- » All-terrain, wireless remote control, auto-leveling Slinger with an abundance of capabilities.
- » Most versatile & capable Slinger in the CAS® fleet.

TR20

- » Rubber tracks allows operation in the most extreme of environments.
- » Low ground pressure (4-7psi) allows for operation in sensitive vegetation.
- » Operates at extreme inclines, up to 29 degrees.

TR30

- » Manned, off-road, all-terrain slinger built on the proven U.S. made Morooka Chassis.
- » ROPS certified & climate-controlled cabin.
- » 3-6psi allows for operation in sensitive vegetation.

MAGNUM

- » Designed for large-volume jobs, continuous loading capabilities with minimal downtime.
